

Regional Innovation Hubs are an Oregon Innovation Council (Oregon InC) program. Oregon InC is a public-private partnership that supports innovators to take new technologies from an idea to market, oversees Business Oregon's innovation programs, and is guided by Oregon's 10-Year Innovation Plan.

What is a Regional Innovation Hub?

Regional Innovation Hubs are partnerships that provide technical assistance, capital, networking, mentorship, and talent development to innovation-based entrepreneurs statewide. Regional Innovation Hub partnerships assist entrepreneurs with innovation-based business concepts across varied sectors, also serving as a regional network of service providers to build and grow a culture of innovation throughout Oregon's regions.

Why Innovation?

Regional Innovation Hubs are specifically focused on supporting the growth and development of high-growth, scalable, innovation-based companies primarily focused on science and technology. Covering a wide array of sectors, data shows innovation-based companies have the greatest impact on Oregonians' quality of life and economic resilience. They help the state weather economic challenges and create resilience because these businesses create better paying jobs with higher growth potential and diversify our state's economy.

Regional Innovation Hub Services

- Technical Assistance
- Access to Capital
